## Introduction

This document outlines the outcome of completed system tests. Incidents, Defects and Changes that need to be made will be presented here formally. Although the ideas expressed here are separate entities, they will be combined into this one document.

## Incidents

This section defines the incidents discovered while performing various tests on the system. This section will expand as more incidents are found. For each incident there is a serial number.

ID	1
Description	Data visibility on the school database
Date	13-11-2019
Severity	low
Responder	Bonoldi Enrico - Ambrosi Marco
Cause	Wrong configuration inside the DB scheme for our user access level
Status	Close
Resolution	Check the previous user access levels and update the references

ID	1
Description	The ETL doesn't respond to the actual data structure
Date	10-12-2019

Severity	medium
Responder	Bonoldi Enrico
Cause	Wrong configuration inside the Laravel service
Status	Close
Resolution	Check the data structures inside the database imports
ID	3
Description	Data normalization inconsistency
Date	29-11-2019
Severity	medium
Responder	Lorenzoni Luca - Bonoldi Enrico
Cause	Exported data was not normalized and errors were presents
Status	Close
Resolution	Validation system

## Defects

At this time, defects that were found were labeled as incidents.

## Summary

Up to now there are no other issues with the project.

Further system testing will be done as newly implemented features become available. These features include all the functionality of the Students page which entails adding and removing reviews on companies.
